

## Curious kids, a furry friend and a mission to discover.

LIVE ACTION + PUPPETS · 6 × 8–10 MIN · AGES 2–7 · EDUCATIONAL · ADVENTURE

## The series

Godín is a clever little dog. Every time he steps into his doghouse, he becomes a puppet scientist and explorer. Together with Sathiri, the robot he built himself, he travels across Ecuador and the world to answer the questions of the Salva Planeta (Planet Savers), a club of children from all over the world who care for nature: the insect that glows with its own light in the cloud forest, the whales of the Galápagos, the Amazon rainforest, or the place where water begins in the high mountains of the Andes.

## In every episode

- **Music:** songs and simple dance moves with Teacher Fernanda and DJ Cuya.
- **Mindfulness:** yoga and breathing with the Praying Mantis to help kids manage their emotions.
- **Environmental awareness:** gardening, recycling and an activity for parents and kids.
